Ecology of *Acidobacteria* and *Verrucomicrobia* in the plant-soil ecosystem

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
vrijdag 22 oktober 2010
om 11.00 uur

door

Ulisses Nunes da Rocha

geboren op 29 mei 1981
te Rio de Janeiro, Brazilië

Promotor:	Prof. dr. J.D van Elsas
Copromotor:	Dr. L. S. van Overbeek
Beoordelingscommissie:	Prof. dr. O. Kuipers
	Prof. dr. S. Agathos
	Prof. dr. G. Kowalchuk

ISBN (Book):	978-90-367-4577-2
ISBN (Digital):	978-90-367-4576-5

This research was part of the Ecogenomics program which is sponsored by the Dutch National Genomics Initiative and the basic research program on sustainable agriculture (KB4) sponsored by the Dutch ministry of agriculture, nature and food safety.

Table of content

Summary	7
Chapter 1: General Introduction	9
The great plate count anomaly (GPCA)	10
Hitherto-uncultured bacteria – The unseen majority	11
<i>Acidobacteria</i>	13
<i>Verrucomicrobia</i>	17
Implications of the GPCA for rhizosphere ecology	18
Objectives	19
Approach	19
Working hypothesis	20
Research questions	20
Outline of the thesis	21
References	24
Chapter 2: Exploration of hitherto-uncultured bacteria from the rhizosphere	29
Abstract	29
Introduction	30
Soils, plant roots and microbial communities – an intricate triplet	34
Dominant hitherto-uncultured bacteria in the rhizosphere	36
Ecology of hitherto-unculturable bacteria in the rhizosphere	39
Methods to improve bacterial and Archaeal culturability	44
Towards the as-yet-uncultured microbial populations in the rhizosphere and their basic ecology	48
Conclusions	49
References	51
Chapter 3: Cultivation of hitherto uncultured bacteria belonging to the <i>Verrucomicrobia</i> subdivision 1 from the potato (<i>Solanum tuberosum</i> L) rhizosphere	57
Abstract	57
Introduction	58
Materials and methods	59
Results	64
Discussion	75
Conclusions	78
Recommendations and perspectives	78
Acknowledgements	78

References	79
Chapter 4: Isolation and partial characterization of <i>Holophaga</i>, <i>Luteolibacter</i>, unclassified <i>Verrucomicrobia</i> and <i>Verrucomicrobium</i> spp. from the leek (<i>Allium porrum</i>) rhizosphere	82
Abstract	82
Introduction	83
Material and methods	84
Results	87
Discussion	95
Acknowledgements	99
References	100
Chapter 5: Real-time PCR detection of <i>Holophagae</i> (<i>Acidobacteria</i>) and <i>Verrucomicrobia</i> subdivision 1 groups in bulk and leek (<i>Allium porrum</i>) rhizosphere soils	103
Abstract	103
Introduction	104
Material and methods	105
Results	111
Discussion	115
Acknowledgements	118
References	119
Chapter 6: Rhizocompetence of culturable <i>Holophaga</i> (<i>Acidobacteria</i>) sp. in the leek (<i>Allium porrum</i>) rhizosphere	121
Abstract	121
Introduction	122
Material and methods	123
Results	127
Discussion	132
Acknowledgements	134
References	135
chapter 7: Different rhizosphere competence in two <i>Verrucomicrobium</i> subdivision 1 strains previously isolated from the leek (<i>Allium porrum</i>) rhizosphere	137
Abstract	137
Introduction	138
Material and methods	139
Results	143
Discussion	149
Acknowledgements	151
References	152

Chapter 8: Distribution of different <i>Acidobacteria</i> and <i>Verrucomicrobia</i> subdivision 1 groups over compartments of different plant species	154
Abstract	154
Introduction	155
Material and methods	156
Results	160
Discussion	168
Acknowledgments	171
References	172
Chapter 9: General Discussion	174
Dominant hitherto-uncultured bacteria in the rhizosphere	174
Diminishing the gap between cultured and total bacteria in rhizosphere samples	175
Phylogeny and phenotypic analysis of culturable <i>Acidobacteria</i> and <i>Verrucomicrobia</i> from the rhizosphere	176
Phenotypic analysis of culturable <i>Holophaga</i> and <i>Verrucomicrobia</i> subdivision 1	177
Real-time PCR detection of particular <i>Acidobacterium</i> and <i>Verrucomicrobium</i> types in bulk and rhizosphere soil	178
<i>Holophaga</i> and <i>Verrucomicrobium</i> subdivision 1 spp. show shifts in abundance from bulk to rhizosphere soil	180
Environmental factors that affect the distribution of <i>Acidobacterium</i> and <i>Verrucomicrobium</i> spp. over rhizosphere and bulk soil	182
Future perspectives	184
References	188
Appendix	191
Samenvatting	195
Aknowledgments	197
About the Author	199
